

School districts across the state are announcing the changes, but many are neglecting to tell parents of their rights **which are guaranteed under PA law regarding vaccine exemptions.**

If your school district is misinforming parents – please take action!

- Inform the school administrators and school board that the law allows for exemptions and they are misinforming the public which could negatively impact students.
- Immediately contact your [PA Senator and Representative](#) to inform them that your school district is misinforming parents. Please ask your state legislator to protect existing exemptions and ask that they initiate legislation that would require schools to accurately inform parents of the vaccine regulations (including exemptions) as this topic is vitally important to you. Schools must be required to tell the truth and **MUST** be held accountable for lying.
- Ask your state legislators to support legislation that will reform the regulatory system and prevent state agencies from passing additional vaccine requirements without legislative involvement.

Pennsylvanians still have the right to use one of three valid vaccine exemptions: medical, religious, or “strong moral or ethical belief” (sometimes referred to as philosophical).
