Please join us on **April 30, 2019 at 10:00am** in the Capitol Media Center to hear experts speak in support of Hb286, The Informed Consent Protection Act.

HB286 Seeks to end the unethical practice of discrimination in health care practices being experienced by families who are not following the CDC recommended vaccine schedule of 26 doses by 12 months. The bill seeks to alleviate doctors from the financial pressure to only serve fully vaccinating patients, thus freeing the doctors to provide appropriate, equal, individualized care to all PA families.

Hosted By Representative Daryl Metcalfe and including featured speakers:

**Dr. Alvin Moss** is a medical doctor and professor, specializing in medical ethics.

**Mary Holland** is a law professor at NYU focusing on human rights and health law. She is the author of three books on the subject of vaccine risk.

**James Lyons-Weiler, PhD** is a research scientist, author and president and CEO of Institute for Pure and Applied Knowledge (IPAK).
