

## Did You Know:

- **As of 1986**, vaccine manufacturers are not liable for harm caused by their products in the US. Since that time, **US taxpayers have paid over \$3.2 billion** in awards to victims of vaccine injury through the Vaccine Injury Compensation Program.
- **There are now 72 (SEVENTY-TWO!)** doses of vaccines on the childhood schedule. This is double the number given in the year 2000, triple the 1980s schedule.
- **The safety** of the current combined vaccine schedule **has never been studied.**
- Vaccines are already available to anyone who wants them.
- **Vaccines are not tested** for carcinogenicity or effects on pregnant women or fertility.

**PCIC** recognizes the powerful influence of PhRMA lobby. With lobbyists driven by **projected 2016 vaccine revenue of \$54 billion**, elected officials are under significant pressure to push vaccines without having a full view of the facts, science, and implications of such laws. PCIC is working to empower citizens to educate their legislators fully about the subject and the **inalienable right** of citizens in a free country to maintain informed consent for ALL medical procedures.
