

Please support HB 286. It removes financial pressure placed on pediatricians to require that patients comply with this untested vaccine regimen.

In 1986, Congress passed the **National Childhood Vaccine Injury Act of 1986**, granting vaccine manufacturers and physicians immunity from most lawsuits,¹ and establishing **The National Vaccine Injury Compensation Program**. As of 2/4/2019, over \$4 billion has been awarded to over 6,000 victims of vaccine injury or death, despite most claims being denied.²

Since 1986, the childhood vaccine schedule has more than tripled. The CDC now recommends over 70 doses of 16 vaccines by age 18,³ including 26 by a baby's first birthday. American companies are developing 260 more vaccines.⁴

Childhood vaccine ingredients include polysorbate 80, monkey kidney cells, calf/bovine serum, and aluminum hydroxide. **Vaccines have NEVER been assessed for carcinogenicity**⁵ despite containing known carcinogens, such as **glyphosate, formaldehyde**, sulfuric acid, benzethonium chloride and/or thimerosal, a mercury derivative in multi-dose flu shots approved for babies as young as 6 months old.⁶

In 2011, the **Supreme Court shielded drug companies from all liability** for government mandated vaccines, even when safer ones could have been created, declaring them, "unavoidably unsafe."⁷
