

ALL RISK, NO REWARD: KIDS AND COVID-19 VACCINE

The protection of children is the cornerstone of civilized humanity. Adults are expected to intervene when children are at risk. That guiding principle has been abruptly abandoned as public health officials exert unparalleled pressure on adolescents to receive COVID-19 vaccines, under the pretense that, if enough of them take it, some at-risk individual *may* be spared.

USING GUILT TO PRESSURE TEENS IS NOW A MARKETING TACTIC FOR EXPERIMENTAL PHARMACEUTICALS.

Pfizer-BioNTech COVID-19 Vaccine Clinical Trial of Adolescents (Age 12-15)¹

Serious or Severe Adverse Events
126/1131 or 11.14%*

*Fever greater than 102.1°F, vomiting that required IV hydration, diarrhea of six or more loose stools in 24 hours, and severe fatigue, severe headache, severe muscle pain, or severe joint pain that prevents daily activity.

Deaths in Ages 0-18 Where COVID-19 Was Indicated on Death Certificate²

1/290,000 or 0.039%

(You probably cannot see the line that represents these deaths on the pie chart because it is infinitesimal, even on this enlarged version.)

Since only 1,131 vaccinated children 12 to 15 years of age were observed in the 2 month clinical trial, findings were statistically insufficient for proving whether the vaccine is safer than the disease in children 12 to 15 years of age.³

The necessary data for making informed decisions does not exist. Long-term effects may not be realized for years. Even FDA approval will not guarantee safety. Until gold-standard, long-term safety data become widely accessible, every COVID-19 injection is a shot in the dark.

Promoting an experimental product that has no proven benefit to its recipients is unethical. When those recipients are children, it is reprehensible.

PLEASE TAKE ACTION TO PROTECT OUR CHILDREN.

- PROHIBIT COVID-19 vaccine marketing or administration in schools.**
- PROHIBIT COVID-19 vaccine mandates for minors IN ANY SETTING.**
- PROHIBIT taxpayer funding of COVID-19 vaccine marketing.**
- PROHIBIT incentivizing minors to receive vaccines.**
