

# Keep Pharma Out of PA Schools!

Children have been reporting that the PA Department of Health vaccine clinics create an atmosphere of

- **bullying**
- **coercion**
- **pressure**

as some schools are marketing pharmaceutical products directly to our children and shaming them for not participating. Please protect medical privacy in our schools!

The Wolf Administration's school COVID testing plan hands over **\$87 million of ARP funds** to Ginkgo Bioworks, a genetic engineering company based in Boston, MA.<sup>1</sup>

This group testing, or "pooled" testing, conducted in schools does **NOT** identify any specific individual who is positive for COVID, nor does it tell us whether or not anyone has symptoms or is contagious.

Additionally, testing healthy children in schools teaches them that they are "sick until proven healthy".

**Vaccine clinics, testing, and the CDC COVID curriculum have NO PLACE in Pennsylvania schools.**
